

Afraid of Friendship

X-left to die

Please stay out of my life
Now I don't like you anymore
And please stop (to) your tries
Will not making love nevermore
It's time to say goodbye
for next chance I am not a strong
Please nevermore, nevermore

You always made me cry
Now I don't like you anymore
I can't hold on life in lies
Everyday I hear your angry words
It's time to say goodbye
for next chance I am never strong
Please nevermore, nevermore

Can't you see
No one likes me
This little light shines for you

(Go away
far from me)

All the bruises were left behind me
had broken (broken) my heart
It'd broken (broken) my trust
If you everyday feel the same pain
than I love you such
Angels wait for us
If you believe that we'll never see each other
It had broken (broken) my heart
It'd broken (broken) my trust
If you everyday feel the same pain
so I love you such
Angels wait for us

This little light shines for you

(Go away
far from me)
