

Protect Me

X-left to die

Today I'll tell you a little secret 'bout me
You'll never forget what my name is
It was all I have, now it's all I need
You never know what is painless
Why you always look so brown
Why you always fucked around
You never know how are slow
The moment's without you

Today I'm leaving you
It gives you many changes
Today I'm leaving you
Not love you

I trusted you, you made my soul insensitive
I try to forget everything about this shit
It's very difficult to be angry with you
But I swear I will be soon

At first I tried to take it
Maybe it's complicated
'cause I feel down
'cause I feel down

It's time to loose but you'll never protect me
It's time of choices but you'll never want to choose me
It's time to groove but you never promised me
That you would stop your lies
It's time to loose but you'll never protect me
It's time of choices but you'll never want to choose me
It's time to groove but you never promised me
That you would stop your lies

I'm fading away
(Your mother's preacher's right)
I'm falling away from you
I'm fading away
(Your mother's preacher's right)
I'm falling away from you

At first I tried to take it
Maybe it's complicated
'cause I feel down
'cause I feel down

I'm fading away
(Your mother's preacher's right)
I'm falling away from you (protect me now)
I'm fading away
(Your mother's preacher's right)
I'm falling away from you
But I still love you!
