

Back to the Roots

X-Perience

E-mails from outer space
Bytes and bits are on the race
To the moon and return
The light of mankind will burn

Back to the roots
To the place where you're born
Right where the crown of creation comes from
Back to the roots
To the beauty of youth
We are going back to make a new start

World wide web - MTV
Rule the days I am going to be
Slave to screens - to machines
Living in electro city

Back to the roots
To the place where you're born
Right where the crown of creation comes from
Back to the roots
To the beauty of youth
We are going back to make a new start

Humankind on the run
We don't care about what we've done
Neon light night and day
Time is ticking away

Back to the roots
To the place where you're born
Right where the crown of creation comes from
Back to the roots
To the beauty of youth
We are going back to make a new start

Back to the roots
To the place where you're born
Right where the crown of creation comes from
Back to the roots
To the beauty of youth
We are going back to make a new start
