

# Let Me Show You

X-Perience

Creatures crawling through the night  
sleepy snakes awake  
bony fingers, neon light  
a nervous beast will bite

If you wake up now  
and open up your eyes somehow  
I will try to give you what you need  
right here and now

Let me show you the world in my eyes  
then decide to leave and hide  
let me show you the world in my eyes  
then decide to leave and hide  
or stay

Nightmares rushing  
through your head  
a sleep won't heal your soul  
now awake, we're going mad  
we love to loose control

If you wake up now  
and open up your eyes somehow  
I will try to give you what you need  
right here and now

Let me show you the world in my eyes  
then decide to leave and hide  
let me show you the world in my eyes  
then decide to leave and hide  
or stay

Nightmares rushing  
through your head  
nightmares rushing  
through your head

Let me show you the world in my eyes  
then decide to leave and hide  
let me show you the world in my eyes  
then decide to leave and hide  
or stay
