Black and Silver

I am amused You seem to love me But be reserved Before you huff me

I'm used to winners I need the fame And if you touched me You'd be my shame

Your childish dreams are all in vain To me your kind is all the same

A starlit sky Of black and silver is my core My last goodbye Makes you want me even more For silver is my fame Black is my name

I am a queen And if you creep I'll push my blade Still-water-deep

I am a dream A fairy-tale Your endless quest Your holy grail

Thanks so much for your confusion I will be your lost illusion

Deep inside The silver shines as black as can be My disguise The wolf among the sheep, you want me To me your kind is all the same To me your kind is all the same

Xandria
