Now & Forever

Xandria

Millions of songs, all those years in my soul And when we met, I just knew they're for you Now your voice is singing them all Your wings at mine, we will never fall On and on, we will fly now & forever Side to side, now & forever, my love Thousands of miles through the cold stormy air There's really nothing that I wouldn't dare I climb the eye of the hurricane When the winds are whispering your name On and on, we will fly now & forever Side to side, now & forever, my love Now & forever, now & forever (Now & forever) Fly, fly, now & forever (Now & forever) Now & forever We will fly now & forever Side to side, now & forever ... now & forever ... now & forever
