

Follow the Night

XYZ

There's a strip bar at the corner
It's a dirty part of town
Where the streets are getting hotter
As the sun is going down
It's been a long day, the longest day
There's a moon light in the gutter
And a guitar on my mind for the city blues
I'm gonna slow down, slow down
And follow the night for a while
I'm gonna slow down, slow down
And follow the night for a while
Just a little while
I've got no plan whatsoever
I'm gonna play it all by ear
Maybe walk a little further
Get some cigarettes and beer
Another long night, the longest night
There's a moon light in the gutter
And a guitar on my mind, for the city blues
I'm gonna slow down, slow down
And follow the night for a while
I'm gonna slow down
And follow the night for a while
