

Get Loose!

Yashin

You've got the face of a stranger
But you talk to me like I'm your friend
But everyone suffers inside
To your precious hideout
But I try to hide it
Why are you scared (you're scared)
To step away (step away) from the crowd

You always used to get your way
You can't get it all, you can't get it all
you always used to take away
You can't get it all, you can't get it
Bite your tongue, you will see, what this life's taking away...
Away
You can't get it all, you can't get it

Open your arms and I will fall
And I will fall, into nothing cause you're gone
We've been nothing for too long
Why are you scared (you're scared)
To step away (step away) from the crowd

You always used to get your way
You can't get it all, you can't get it all
you always used to take away
You can't get it all, you can't get it
Bite your tongue, you will see, what this life's taking away...
Away
You can't get it all, you can't get it

It's just a matter of time
Pictures of our love in your eyes
It's just a matter of time
Burning pictures of our life left behind
It's just a matter of time
Burning bridges I left behind

Bite your tongue, you will see, what this life's taking away
You always used to get your way
You can't get it all, you can't get it all
you always used to take away
You can't get it all, you can't get it
Bite your tongue, you will see, what this life's taking away...
Away
You can't get it all, you can't get it.
