Wil we make it?
Will we make it out alive?

This it eating us alive
Is this what it feels like?
To be left behind?

And we will carry on And pretend we're strong Keep ourselves lost Behind these walls

This is eating us alive This is eating us alive

Will we make it out alive? Standing still just you and I This is the one tonight This is the one tonight (This is the one tonight)

This is ripping us apart Can we make a new star? A new star?

And we will carry on and still stay srong Show the where they went wrong

Will we make it out alive?
Standing still just you and I
This is the one tonight
This is the one tonight
(This is the one tonight
They'll never break away)

You'll never take me away From what we swore we'd all be Look back and you'll see (That we'd die for our dreams)

All along have we been wrong? Take another can and run All along have we been wrong? Take another can and run All along have we been wrong? All along have we been

What have we done?
What have we become?
What have we become?
What have we done?
What have we become?

Will we make it out alive? Standing still just you and I Tištěno z www.txp.cz
