

The Game

Yashin

The city lights don't shine for me
I hope this glow is all I see
The stars are diving in

Why do you always see the worst in me?
You found comfort eve without me by
There was a time when I was free
She showed me what it was to be
The quiet kids caught up with me

And do you really want forget the
Run for your life
And do you really want forget the
Run for your life
We let it slip away the
Save your vessel

And I can see it now, all the times that I lost my way
I pray that these words will find the wave
Life will change everyday, but we will stay the same

And do you really want forget the
Run for your life
And do you really want forget the
Run for your life
We let it slip away the
Save your vessel

And do you really want forget you
And do you really want let go of her
Of your eyes is something new!

And do you really want forget the
Run for your life
And do you really want forget the
Run for your life
We let it slip away the
Save your vessel

And do you really want forget the
Run for your life
And do you really want forget the
Run for your life
We let it slip away the
Save your vessel
