Final Path

Yeasayer

Everybody's got the bomb
But if the knees stand strong were gonna dance til were gone
Keep on forgetting that the flashing light I'm under
Is a fire up of Armageddon

Nothings gonna stop the sky from falling
Nothings gonna stop the water rising
Nothings gonna stop the sun from burning out

Any day any day any day any day now
Any day any day any day any day any day any day now

You gotta let em sort out the good dancer
From the evil and the bad cause we all got
To line up and start marching on that final path

You gotta let em sort out the good dancer
From the evil and the bad cause we all got
To line up and start marching on that final path

No one ever wants to fall
But if you can't keep a beat you'll be the first when they call
So lets close together so the nights will find it harder
And harder to come and get us

Nothings gonna stop the sky from falling
Nothings gonna stop the water rising
Nothings gonna stop the sun from burning out

Any day any day any day any day now
Any day any day any day any day any day any day now

You gotta let em sort out the good dancers
From the evil and the bad cause we all got
To line up and start marching on that final path

You gotta let em sort out the good dancer
From the evil and the bad cause we all got
To line up and start marching on that final path
