

I wanna love, I wanna leave
I want you to love me
I want you to leave me
I wanna stand where I can see
I'm watching you love me
I'm watching you leavin' me now

I wish I could be somebody else
I wish I could see you in myself
Wish there was something inside me
To keep you beside me and
Say what you really feel
You know I need something that's real
I wish there was something inside me
To keep you beside me

I wanna know if I could be
Someone to turn to
That could never hurt you
But I know what you think of me
Yea, you had a break-through
And now I'm just bad news for you

I wish I could be somebody else
I wish I could see you in myself
Wish there was something inside me
To keep you beside me and
Say what you really feel
You know I need something that's real
I wish there was something inside me
To keep you beside me

I should've told you everything
I never gave you anything
I should've told you everything
If I could give you anything
You know I'd tell you everything

I wish I could be somebody else
I wish I could see you in myself
Wish there was something inside me
To keep you beside me and
Say what you really feel
You know I need something that's real
I wish there was something inside me
To keep you beside me

I should've told you everything
I should've told you everything
I should've told you everything
