

One Bedroom

Yellowcard

Stay the night, touch the sky with me
We can live like we have forever
Spend your days, watch the waves with me
We can love like we are forever

You're the light from the moon tonight
You're the history I will write
You're the last stop and I arrive
You're the one for the rest of time

What good could I do in a life without you?
What more could I lose than what I found in you?
In you, in you

When you're gone you belong with me
Cause you know that we are forever
Take your time to realize you'll see
We will always be here forever

You're the light from the moon tonight
You're the history I will write
You're the last stop and I arrive
You're the one for the rest of time

What good could I do in a life without you?
What more could I lose than what I found in you?
What words could I use to say all this to you?
What verse could I choose to give myself to you?
To you, to you
To you, to you

I wanna love with you and live, yeah
Live right here forever
I wanna love with you and live, yeah
Live right here forever
I wanna love with you and live, yeah
Live right here forever
I wanna love with you and live, yeah
Live right here forever
