## It Comes Over Me

## Yendri

It comes over me and I don't want to be it With all the hate and all the desperation It comes over me and I cannot believe it This seems to be my only destination I'm so lost and full of hate

And I know it's much too late
There's no chance for enlightment
This will be my fate
IT comes over me and I can't defend me
The only thing is to surrender now
