

# Please, Dear Machine

Yendri

Please, dear machine  
inhale my soul and let it die  
Kill my body and take my mind  
Come on, come on, oh, give it a try  
Make me one of your kind

Init system, init system, init system, starting up  
CPU, CPU, CPU, never stop

Please, dear machine  
Take me into your realm  
Give me wires, e-lec-tricity  
Realize my final dream  
And turn it into eternity

Interrupt, interrupt, interrupt, login in  
Alterate, alterate, alterate, login out

Please, dear machine  
Show me how to be cold  
Just be my instructor  
I'll always do what I'm told  
Let me be your destructor

Extraction, extraction, extraction, compile  
Activate, activate, activate, writing file

Please, dear machine  
Turn me into steel,  
plastic, chips, circuits,  
Nothing I want to feel  
Just being binary bits

Operate, operate, operate, verify  
Execute, execute, execute, finalize
