## Man in the Moon

I am the man in the moon And I hope to shine upon you very soon Waiting in the night To bathe you all in moonlight I am the man I am the man in the moon

Silently revolving Wandering through the heavens above On my own

Round and round and round I go When I stop no one will know

I am a creature of the night And I hope to come and shed a little light Although the universe our teacher I remain the central feature I am the man I am the man in the moon

Round and round and round I go When I stop no one will know

Silently revolving Wandering through the heavens above On my own

I am the man in the moon
