

Where Will You Be

Yes

Where will you be when you're not here?
How many lives in this earth time?
You are my soul and this you are
Two souls intertwined, that's what we are

We can, we walk, hand in hand all the life
Be the one, everything to me
You, I am dreaming
We have lived and known before I feel it

Where will you lie?

When will I know when you are gone?
Where I be, and I will miss you?
We are this love in this life
Two should intertwined like once before

See this meeting, hand in hand every life
Be the one, everything to me
You are my feeling

No need to fear this love of life
We are the truth of every earth life
No need to fear this life at all
We are the sun and everlasting life

Where will you be hearing this song?
How many lives in this earth time?
You are my soul and this you are
You are my soul and this you are

Where will you lie?
