

## Insect Eating Man

Yeti

While other folks dine at the Ritz  
I've found a place that's quite the pits  
And really satisfies my dining needs  
Infested with crickets and gnats  
Jiggers, flukes and scallywags  
Cockroaches, midges and millipedes  
I'll tell you gladly, it's no secret  
I see a creepy crawly, I eat it

My soup's got a fly in  
And there's woodlouse in my wine  
My bread has fleas on  
But I can see no reason  
To be shy  
I'll try  
To eat them if I can  
Now for I'm an insect-eating man

Bedbugs in the butter  
And butterflies on the cutlery  
My salad's tasty  
Because it contains ladybird  
Absurd, you say  
But I don't see it that way  
Because I'm an insect-eating man

Not hard-boiled eggs, oh, but daddy long legs  
Instead of Brie, a bumble bee  
Buzz buzz buzz  
Forget burritos, give me mosquitoes  
No broth, just moth

Ants all over my lamb shanks  
And ticks on my asparagus tips  
A smattering of weevil  
Well, I know you think I'm evil  
But believe, I'm not  
They were hiding in the pepper pot  
They all larvae (love an) insect eating man

Not hard boiled eggs, no, but daddy long legs  
Instead of Brie, a bumble bee  
Forget burritos, give me mosquitoes  
No broth, just moth  
One last time

Aside from honey, what do honeybees make?  
A crunchy base for an insect cheesecake  
Topped with beetles in their jelly  
Which I prefer to black cherry  
Very quaint, for sure  
But now I'll eat some more  
Just like an insectivore  
Because I'm an insect-eating man  
Oh yes I am  
All together now  
I'm an insect-eating man

Antenna fan  
I'm an insect-eating man
