Night Falls on Hoboken

Frightened face Worried dream Break my heart With your sad scream

Sun is down Spirits low Hate my impatience And here I go

Come on, let's leave our misery And crawl toward where we want to be Can't we try? Can't we try?

Come on, sleep one night peacefully When I'll yawn all day easily And rest up my mind

Weary guise Mine the same Why so worried? You can't explain

Come on, let's leave our misery And crawl toward where we want to be Can't we try? Can't we try?

Come on, sleep one night peacefully Then I'll yawn all day easily
