

Little Black Box

Yoav

Hey, I always knew that we'd end up this way
I just assumed some day you would betray
Now I don't know if these points of view create
These situations so I can contain

I can hold you
I control I control it all
Keep it locked I keep it locked in a little black box
I keep it locked I keep it locked in a little black box
In a Little black box

Hey-well you got your kicks you had your fix of fun
My love you always were the restless one
Now I don't know who is cursed and who is blessed
Because love that's leaving looks the loveliest
I can hold you

I control I control it all
Keep it locked I keep it locked in a little black box
I keep it locked I keep it locked in a little black box
In a little black box

She's so very young still child within
Will light the eyes and flash sometimes
Before the age-old grown disguise
Sets Easily back across her features
And even flawless creatures
Are each as tainted as the rest of us
Cat curious and alone in the rooms I rent
She roams when I'm not there
And she's drifting away
Hey-I can see your skin
Peek through little black squares
The sheen shimmers catch my reflection there
Each part of the net traps a tiny piece
Of my wantings and my vanity
Keep it locked I keep it locked in a little black box
I keep it locked I keep it locked in a little black box
A little black box
Keep it locked I keep it locked in a little black box
I keep it locked I keep it locked in a little black box
In a little black box
Hey
