

Come On Progeny

Yonderboi

He jumped off a rooftop, thought he could fly
the sky was embracing him with a cry
some of us screamed but he did not seem to care
was this a dream or was a nightmare

You make your way just to the sun
the best track you were ever on
face the day when you were born
you're making your way just your way just to the sun

He jumped off a rooftop thought he could fly
the sky was embracing him with a cry
he spread his wings and he just stepped off
there came a wind and took him above

You make your way just to the sun
the best track you were ever on
face the day when you were born
you're making your way just your way just to the sun
