

We've got a long way to go
We're too hidden
I can feel it in my bones
Have we found it?

We were two ships in the night
Passing by in the pale moonlight and capsized
We were two ships in the night
Hellbent on trying to survive and capsized

The moon will shine her light
Don't find the tides they ride
Give anything, float around my darling
I can't save you, the current is too strong
Our madness all along
Oh wicked cane I am my darling
And you can't save me

We were two ships in the night
Passing by in the pale moonlight and capsized
We were two ships in the night
Hellbent on trying to survive and capsized
