

# Echoes

Young Guns

On and on it echoes  
[?] left for dead  
No one matters  
Just memories like fire off the edge  
Existing below  
Spin the totem and pray it doesn't slow  
Hard to let go  
Watch you until nothing's left  
(Till nothing's left)

Echoes fade  
I will never be the same  
I'm longing for yesterday  
When all the echoes fade away, fade away  
Fade away

On and on it echoes  
Memories they flicker in my head  
Hard to let go  
I follow like a lamb to slaughter led  
Time is so slow  
The sight of us is bowing from the dead  
Hard to let go  
Watch you until nothing's left  
(Till nothing's left)

Echoes fade  
I will never be the same  
I'm longing for yesterday  
When all the echoes fade away  
I wish I could change  
I never found the words to say  
You're beautiful when you decay  
When all the echoes fade away, fade away

Stop looking for forevermore  
Exist in your own moment not theirs  
Accept the fact you're not responsible  
For everything  
Deep down I know that I've been living for  
But I'll be here again [?]

Echoes fade  
I will never be the same  
I'm longing for yesterday  
When all the echoes fade away  
I wish I could change  
I never found the words to say  
You're beautiful when you decay  
When all the echoes fade away, fade away  
Fade away
