

# Tragedy

## Young Love

How did we fall so hard so fast?  
Your blood is all over the sky  
How did we fall so hard so fast?

The current came and washed them all away  
The people said the current came and washed them all away

Floating up above your fire  
I can hear you calling out for me  
Floating up above tragedy

The current came and washed them all away  
The people said the current came and washed them all away  
(Away, away, away, away)  
The people said the current came and washed them all away  
(Away, away, away, away)  
The people said the current came and washed them all away  
(Away, away, away, away)

The current came and washed them all away, away, away, away  
The current came and washed them all away, away, away, away  
The current came and washed them all away, away, away, away  
(Hold on, hold on, hold on)

The people said the current came and washed them all away  
(Away, away, away, away)  
The people said the current came and washed them all away  
(Away, away, away, away)  
The people said the current came and washed them all away  
(Away, away, away, away)  
The current came and washed them all away  
(Away, away, away, away)
