

# Underneath The Night Sky

Young Love

Loud screams, fighting words  
Awful things were said  
You might not be able to take back  
She puts her hands on his face  
And tells him  
Get out, get out  
Just leave, she pleads  
He can't believe what he's done  
As he's walking down the street  
The night keeps warning him to turn around

Underneath the night sky  
Take flight  
Underneath the night sky  
She cries  
Underneath the night sky  
One last time  
You know where I'm going  
Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again

On his way to familiar arms  
Someone who will know him  
The girl who understands  
Stops dead in his tracks to see  
It's too much too give up  
Not too late for apologies  
Turns down the wrong street  
Give me all your money  
Should know better than to be here alone  
Tries to run, doesn't feel like a fight  
She could hear the shots ring out from home

Underneath the night sky  
Take flight  
Underneath the night sky  
She cries  
Underneath the night sky  
One last time  
You know where I'm going  
Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again

(Don't forget to hold her tight  
Everything can change so fast)

Underneath the night sky  
Take flight  
Underneath the night sky  
She cries  
Underneath the night sky  
One last time  
You know where I'm going

Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again

Don't forget to hold her tight  
Everything can change so fast  
No no no  
Don't forget to hold her tight  
Everything can change so fast
