

# Glacier

Youngblood Hawke

Wailin wind is ripping off my windows  
expose sky to me  
friends of mine swim so far  
that they cant be reached  
leave a little in your wayside wake

From the islands that weve crossed  
to the time we think weve lost  
from the cages to the castles that well make  
from the islands that weve crossed  
we shake the water off  
like a silver glacier slowly shrinks away

Saw it in the newspaper  
write whatever you like  
every single word that is on your mind  
every single time that you feel inclined  
you have to unwind

From the islands that weve crossed  
to the time we think weve lost  
from the cages to the castles that well make  
from the islands that weve crossed  
we shake the water off  
like a silver glacier slowly shrinks away

I never saw you  
I never saw you leave  
I never saw you  
I thought you'd see me  
I never saw you  
I never saw you leave  
oh oh oh  
oh oh oh

From the islands that weve crossed  
to the time we think weve lost  
from the cages to the castles that well make  
from the islands that weve crossed  
we shake the water off  
like a silver glacier slowly shrinks away

From the islands that weve crossed  
to the time we think weve lost  
from the cages to the castles that well make  
from the islands that weve crossed  
we shake the water off  
like a silver glacier slowly shrinks away
