

Crystalline

Younger Brother

Don't disappear
I need to know
You were there

Don't fade away
Distant memory
Wait for my death

So you knew my heart
So you knew my heart

In another time
We would meet
With the worlds colliding
At our feet

I look through the air
See all the lives
I can see your eyes
They're so bright

So you knew my heart
So you knew my heart

Be what you want to be
See what you want to see
Say what you want to say

Run if you want to run
Ride if you want to hide
Try but this won't go away

So you knew my heart
So you knew my heart

Where did you come from?
How'd you get here?
Went across the sky
Without a care
