

These Lights

Your Demise

These Lights

sitting on the seats taking a long ride home
just me, my self, at night
losing my heart got my self in here
staying in tonight
when your heads down and low
but i still sit on my own

over thinking my self today
writing storys to songs that are very known
coming round allthese seats we've shared
day in, day out, day care

all these lights moving in the streets
and the street light litend up my mind
i stand for ever just to be kind

maybe every day people scream and shout
like they do every night
but i still share these daytime sights
(these daytime sights)
maybe losing there love
may these peopletalkto the one

but when your heads down and low
but i still sit on my own

over thinking my self today
writing storys to songs that are very known
coming round all theseats ee've shared
day in, day out, day care

all these lights are moving in the streets
and the street lights litend up my mind
i stand forever just to be kind
just to be kind x(3)

all these lights are moving in the streets
and the street lights
litend up my mind
i stand for ever just to be kind x(2)
