

## What Price Happiness

Youth Brigade

What price happiness, a price you can't afford  
Still we pursue this feeling as though it were the greatest reward  
They say that love's the only way to find true happiness  
So why do we keep fighting for a life that makes no sense  
How did the system of greed begin  
In pursuit of happiness to fill a need within  
They say there's nothing in this world that you can't buy  
Yet the price of happiness is forever too high  
What price, what price happiness?  
What does this word happiness signify to you  
Just a fleeting feeling well that's nothing new  
Our lives are short death is certain  
Don't think about that final curtain  
You're happy for so short a time  
Happiness treads a very fine line  
What price, what price happiness?  
For everyone that is happy there are a million that are sad  
Poor, starving, fighting, dying for the elusive life we have!
