Of course I'm thankful for another day, my Lord I can't lie But everytime I wake up, seem like one of my people gotta die Anthrax poisoning, Hussein and them blew up the Trade Center Summer, Fall, Spring, Winter, people in the projects getting thinner Barely enough government cheese, left to feed the rats But we gotta get it how we live, and how we live is selling crack How we live is kicking doors, how we live is pimping whores How we live is what we do, so we don't live like this no more How we live is wrapping em up, sipping on my weight to receive An overloaded Houston Texas, niggaz make they own bleed Every night another murder scene, that could of been prevented But the truth is we most def, and the last soul tormented Every now and then I duck my head, up in the sunday service That's the only place where 5-0, won't burst us bust us Nigga they don't love us, they wanna relocate us to the Penn We wanna do right, but all we see is sin

In this land, we need you Jesus Lord have mercy, we need shelter in the time of storm Uh-huh, well, well, well

Yeah, Rosta fall right help me, help me
All the young picking them, living in a rush just to get wealthy (wealthy)
And in the ghetto, we struggle or we hustle til we bubble
On top, eliminating competition when we buck shot
Don't press that new, but a new clear shot
Fire, fire, fire, fire (fire)
Too many sickness and disease, under attack from overseas
Mighty job me and for God, please come save the day
If I should die before I wake, me leave a blessing for the people today
Mighty job me and for God upon you, take this pain away

In this land, we need you Jesus Lord have mercy, we need shelter in the time of storm Uh-huh, well, well, well

Now I lay me, down to sleep I pray the Lord keep my body, as my enemies creep Don't wanna be another statistic, living through c.d.'s Either the graveyard or max. security, prison you'll see G Look at the homie's little girl, she ain't nothing but sixteen Trying to support three kids, so she stay coming out her jeans Getting pimped, by somebody that still live with they mama But that's the only way she know, to get away from all the drama As for books, the mind is a terrible thing to waste As for crooks, the line is a terrible thing to taste Ask them niggaz that don bit the bullet, but they still here My nigga we ain't seen God befo', but we still fear I asked him for a plexing, and he sent me Eugene Now I got two cars, a crib and everyday I dress clean But it ain't no love, they wanna put a nigga in the Penn I wanna do right, but all I see is sin

In this land, we need you Jesus
Lord have mercy, we need shelter in the time of storm
Uh-huh, well, well, well
