We Will Bring Glory Tonight

Zanister

You see us a fool so weakened You took our last bit of honor You laugh in our face so often You think you got us down You'll be surprised, when we stand

We are the power and we are the force We have been brought forth to fight We will be victors and we'll win the war We will bring glory tonight

On and on you've tortured
We've heard your bile for the last time
I think you need to be silenced
You think you got us down
You'll be surprised, when we stand

We are the power and we are the force We have been brought forth to fight We will be victors and we'll win the war We will bring glory tonight

You've lined us up for execution We've taken their best shot We'll drive you out of our homeland For honor we have fought

For honor we have fought

You've lined us up for execution You think you've got us figured out Your deadly ways have grown tired You think you got us down You'll be surprised, when we stand

We are the power and we are the force We have been brought forth to fight We will be victors and we'll win the war We will bring glory tonight

We will bring glory We will bring glory
