

# Endless

Zara Larsson

I knew right when I saw you  
History in the making  
Nothing would be the same  
The beating in my chest never felt so strong  
Headed for trouble, yeah

Now I'm sitting at this lonely gate, airport  
Speakers says the flight delayed, damn oh  
That means I could've stayed with you  
A little longer  
Oh, I try to tell myself

Although you're far away  
You're still right next to me  
No distance is too great  
'Cause your love is endless  
My love is endless  
(2x)

Baby, I'm a rolling stone  
Got it going from town to town  
Always in chances  
This life it wasn't made for two  
People try to tell us  
Easier to call it off

Maybe we could use a better judge  
Who'd say  
Love like this is bad luck, damn  
But I know I've never felt this way, before  
I know I've never felt this way

Although you're far away  
You're still right next to me  
No distance is too great  
'Cause your love is endless  
My love is endless

'Cause your love is endless  
My love is endless  
(4x)
