Insomnia

I've been roamin' and strollin' all of these streets Burnin' my eyes red, not slept for weeks Tested with torment, my future is bleak Lost in the moment with no words to speak

I can't find no peace (I can't find no peace)

Am I a fool (fool) Waitin' for you (you) What if you never come back (what if you) What if you never come back (what if you never come back) There's nothin' new (new) I made another hit I made another hit I made another two (made another) What if we never know Why hearts deceive us The night calls the dreamers

My sleep was stolen, I'm searching for thieves These memories in my head, are too vivid to see

I can't find no peace (I can't find no peace) And when I close my eyes I feel it all again I can't find no peace

Am I a fool (fool) Waitin' for you (you) What if you never come back (what if you) What if you never come back (what if you never come back) There's nothin' new (new) I made another hit I made another hit I made another two (made another) What if we never know Why hearts deceive us The night calls the dreamers

Insomnia And when I close my eyes I feel it all again Insomnia And when I close my eyes I feel it all again

Am I a fool (fool) Waitin' for you (you) What if you never come back (what if you) What if you never come back (what if you never come back) There's nothin' new (new) I made another hit I made another hit I made another two (made another) What if we never know Why hearts deceive us The night calls the dreamers
