Throw It All Away

Try talking to you While you do, while you do I swap places with you Just to see things through Just sing me the tune And you'll see I'll keep it here for you I'll wait for your cue

You wrote down all the words Black and white On a wall Just keepin' it so Yeah you know how it goes No plans for a change, nothing strange No not today no way Now sing me the tune

Cash it in and throw it all away Never needed any of it anyway

So you twist and you turn Uncomfortable fool, you'll never learn But you can take a stand Forget all about the plans California rose

Side one track two On a record of you I've even stuck on a groove That I don't wanna lose Just play it again, as a friend It's your favorite worn-in shoes Now sing me the tune

Cash it in and throw it all away, yeah Never needed any of it anyway

So you crash, and you burn Sometimes the road will twist and turn Some of this, less of that Forget all about the map California road

Cash it in and throw it all away Never needed any of it anyway

Cash it in and throw it all away, yeah Never needed any of it anyway

Cash it in and throw it all away Never needed any of it anyway

Cash it in and throw it all away Never needed any of it anyway
