

# Brain Surgery

Zero Hour

My world my life journey through time  
Can't live must leave the hate behind

Pressure building inside my brain  
Help me release the years the pain  
Open my mind and look inside  
Erase all thoughts I've denied

Don't close me up until their gone  
No more agony shall linger on  
When I awake I shall be free  
From all haunting things that I see

Pressure building inside my brain  
Help me release the years the pain

Visions slowly fading (They're fading out for me)  
Memories I'm trading (I trade in to be free)  
Feel them as they leave me (For all eternity)  
Gone for all eternity (They leave me and I'm free)

I feel the cold sharpened steel tear above my brow  
Constant pain inside my brain  
My senses still alert somehow

My world my life journey through time  
I live my life all thoughts behind

No more pressure inside my brain  
Only torment now I'm insane
