## **Testarossa Music**

You're waking up with the demons Girl, you get me up Our bodies deceived us

You better believe it We could die from the rush Our love is a reason why

These walls come falling down Can we keep the flames from burning out We're left with what we found We'll never go, we'll never go

Baby, if we never know Just tell me we're holding on We're holding on to us Baby, if we never know Just tell me we're holding on We're holding on to us

Do you remember the ways that your body was craving [?], baby I've been thinking for days If we change up the pace Do you think it'll faze you?

You better believe it We could die from the rush Our love is a reason why

These walls come falling down Can we keep the flames from burning out We're left with what we found We'll never go, we'll never go

Baby, if we never know Just tell me we're holding on We're holding on to us Baby, if we never know Just tell me we're holding on We're holding on to us
