

Compass

Zola Jesus

I just want something to believe in
Bigger than you and me
I just want something to believe in
Bigger than you and me
Don't want to turn away
Look where the time went
Don't leave yourself in this day
Where was the time spent

'Cause a compass is the call
You don't even know what it's for
Look to the eye of the storm, you're in it
'Cause a compass is the call
You don't even know what it's for
Look to the eye of the storm, you're in it

Only time won't destroy
The skin we're in
And leave us all
Until we begin again
Every day, every night, all the time I wonder
To the end of the line will it finish now?

'Cause a compass is the call
You don't even know what it's for
Look to the eye of the storm, you're in it
'Cause a compass is the call
You don't even know what it's for
Look to the eye of the storm, you're in it

Don't wash your time away
Don't wash your time away
Don't wash your time away
I just want something to believe in
Bigger than you and me
I just want something to believe in
Bigger than you and me

'Cause a compass is the call
You don't even know what it's for
Look to the eye of the storm, you're in it
'Cause a compass is the call
You don't even know what it's for
