

# Dust

Zola Jesus

Give me a open game  
Don't let it get too far away  
This world is not to blame  
You've got to protect your name

When everything, everything, everything goes down  
All the dust will settle in this new world now  
We can make get along together  
We can make get along together

Give me a second chance  
Don't let it fade so fast  
This life isn't make to last  
You've got to run while you can

When everything, everything, everything goes down  
All the dust will settle in this new world now  
We can make get along together  
We can make get along together  
Everything, everything
