

Just A Friend Of Mine

Zoot Woman

Stop me in my tracks now
You know I'll go too far
I can't feel the moment
Let me see the star
Take me through the motions
Know that you know how
All the things that captivate
You can save me now
All the time going out of my mind
See your smile such a different style
All you want to be is just a friend of mine
All you want to be is just a friend of mine
Good time conversation
How could I forget
I can't write off all the history
All that I regret
Feelings contradicting
I can't work you out
Too long complicating
What we're all about
All the time going out of my mind
See your smile such a different style
All you want to be is just a friend of mine
All you want to be is just a friend of mine
