

My World

ZSK

You turn me on, you switch me off, but i won't take it anymore
You are telling lies, you sold me out, and it happened all before

Don't try to tell me, don't believe it anyway
Don't want to argue so get out off my way

My World!

My World!

I go to punkrock shows, as long as punk ain't dead
When all the other trends pass by
I stand up for my friends, and they will stick to me
Always side by side
It is more than just a phrase, fighting for my rights
Move forwards step by step, towards the light

My World!

My World!

Animal slavery, fascist ideologies, police state
And poverty, war and inhumanity
Supporting the cruel machine of this fucked up society
As long as I got a voice to raise no one brings me down

My World!

My World!

And I don't know, I don't know how long it will take
You may see me soon with a gun in my hand
